

SOLAR SYSTEM SPOTLIGHT

MARS

The rusty Red Planet — home to the biggest volcano in the solar system, the deepest canyon, and a fleet of robot explorers driving around right now.

★ ★ ★ DID YOU KNOW? ★ ★ ★

**MOUNTAIN OF MOUNTAINS**

Olympus Mons on Mars is the tallest volcano in the solar system — about **three times taller than Mount Everest** and as wide as the entire state of Arizona.

**ROBOTS ON MARS**

NASA's **Perseverance rover** is exploring an ancient riverbed on Mars right now, looking for clues that tiny living things may once have lived there.
